PANNONE GEMINI 60M THEIR FIRST LARGE MOTOR YACHT

Pasqualino Pannone, who trained in general architecture and specialised in luxury homes, has always been drawn to the Mediterranean Sea, which borders much of his native France. So it is only natural that he also developed an interest in another luxury product: yachts. The 60m Gemini design concept is his first large motor yacht, joining sailing design concepts and a tender in his marine portfolio. The Gemini 60m sports a pronounced profile of flowing lines, which

Pasqualino attributes to his preference for sketching an initial design with pen and pencil. «The computer then comes as a reinforcement, it is a help,» he told Yachts. In terms of exterior spaces, Gemini includes two swimming pools and a hot tub, as well as a vast aft deck helipad. In line with the wishes of the yacht owners of today, he has designed large side windows and hull portholes to let in lots of natural light.
